Exhibitors Keynote Lecture

Room Town & Country A - Session EX-TuM

Exhibition Keynote Lecture

Moderator: Jyh-Wei Lee, Ming Chi University of Technology, Taiwan

11:00am EX-TuM-1 Material Innovations and Challenges of Thin Films and Plasma Applications for 3 nm Node and Beyond, Samuel Chiu (Samuel_Chiu@amat.com), Applied Materials, Taiwan INVITED The inventions of integrated circuits (1958) and the prediction of Moore's Law (1965) will celebrate its 66th and 59th anniversary in 2024, respectively. The foundation of semiconductor industry and its amazing achievement has dramatically changed the way we lived.

With the advents of Artificial Intelligence (AI), Machine Learning and AR/VR (Artificial Reality, Virtual Reality) applications enabled by advanced semiconductor technology, there are high hopes we will see significant breakthrough in many areas such as vaccine research, auto-pilot, astro-physics and super computing, etc.

Taiwan plays a critical role as a hub of semiconductor R&D and manufacturing for the past several decades. In this presentation, the latest innovation of thin film materials and plasma-related process to drive the success of advanced technology nodes will be described. Furthermore, the future challenges and opportunities beyond 3nm nodes in order to keep Moore's Law alive will also be presented.
